

Att: Management of Pipelay vessels

Are you looking for a safe and fast way of connecting CP cables between bracelet anodes and pipelines?

SAFETRACK patented PinBrazing method offer:

- Automated process – Easy to use (just pull the trigger)
- Fast (a few seconds)
- In any position (vertical or horizontal)
- SAFE – No hazardous thermite powder
- No messing with different thermite moulds
- Works in any weather and humidity
- No damage to internal coatings
- No melting of the steel of the pipe
- Silver connection
- Strong, silver brazed, molecular connection
- Safe against corrosion

Safetrack is the leading company for manufacturing of Pinbrazing units and consumables which are included in the SAFETRACK *SilverLine*®.

Our products are highly appreciated by the customers since they have unique benefits that no other brand can offer.
