ECONECT© – Digitized PinBrazing (& SafeBond®) Unit

MM–202–03

SAFETRACK ECO PRODUCT

The patented lightweight and digitized PinBrazing unit ECONECT© reaches a whole new level of performance. Despite same (and even higher) capacity than previous units the weight has been reduced with 60% which not only makes it ideal for maintenance work, but also replace much larger equipment for big projects.

Our lightweight and easy to carry unit is not only ergonomic and economical, but also a part of our project SAFETRACK ECO PRODUCT which is reflected in our continous work for a better environment. One ECONECT© Li–Ion battery saves up to 15 lead batteries.

ECONECT© can also be used for SafeBond® when using the patented automatic SafeBond® Gun SB15 (P/N 91017)
