

## ECONNECT® – Digitized PinBrazing (& SafeBond®) Unit

MM-202-02

The patented lightweight and digitized PinBrazing unit ECONNECT® reaches a whole new level of performance. Despite same (and even higher) capacity than previous units the weight has been reduced with 60% which not only makes it ideal for maintenance work, but also replace much larger equipment for big projects.

Our lightweight and easy to carry unit is not only ergonomic and economical, but also a part of our project SAFETRACK ECO PRODUCT which is reflected in our continuous work for a better environment. One ECONNECT® Li-Ion battery saves up to 15 lead batteries.

*ECONNECT® can also be used for SafeBond® when using the patented automatic SafeBond® Gun SB15 (P/N 91017)*
