

Heavy Duty Drill Bits for Drilling Rails

MM-222-01

Drilling in modern high-strength railway rails sets enormous demands on the drill bits. Far from all drill bits are suitable for this purpose. Therefore, Safetrack has developed a complete range with the most competent drills, made of the market's highest possible material qualities. These drill bits have proven their unbeatable performance through years of testing and use by our railway customers.

Rail-Line Tungsten carbide	
Dia. (Ømm)	Part no.
18	59 RLK 18R
..	..
36	59 RLK 36R

Blue-Line Pro 30 High wear Patent Coating	
Dia. (Ømm)	Part no.
18	59 SBK180
..	..
36	59 SBK360

Drill-Line 30 Twisted Patented Coating	
Dia. (Ømm)	Part no.
6	59 SBW 060
..	..
16	59 SBW 160
Adapter 6-12mm	59 WA612
Adapter 13-16mm	59 WA1316

To be used with Weldon adapter.

Magnetic Swarf Wand

An indispensable tool for all types of drilling and metalworking. Attract easily all chips in a second.

- Operate it just like an air pump
- One-hand operation for use in awkward corners
- Quick release of swarfs
- Permanent magnetic force
- Stainless steel housing, rubber grip and strong neodymium magnet

● Part no. 59104020

Super Drilling Paste

No more carrying heavy cooling fluid reservoir during drilling in rails.

Safetrack Super drill paste (59579) is specially designed to modify the friction for the drill bit when drilling in rails.

Only a small amount on each cutting edge is enough for drilling one hole. The small tube is enough for hundreds of holes and fits easily in your pocket.

The lubricant which is a special mixture of graphite is excellent for many other purposes such as cutting, threading, screws, drilling into stainless etc.
